Please cancel claim 2 without prejudice.

Please add the following new claim.

22. (New) The method of claim 1 including providing a route from the user's current position to a requested destination within said facility.

Please amend claim 14 as follows:

*Sub E* 11. (Thrice Amended) An article comprising a medium storing instructions that enable a processor-based system to:

receive information from a plurality of wireless tags distributed about a facility;  
analyze information from the tags to determine the current location of a user;  
wirelessly link a plurality of shopping carts within the retail facility through a local area network based in the retail facility; and  
enable the carts to exchange information among the carts through said network.

Please add the following new claim 23.

23. (New) The article of claim 11 storing instructions that enable the processor based system to provide information about the route traveled from the user's current position to a requested destination.

Please amend claim 21 as follows:

*Sub E* 21. (Thrice Amended). A system comprising:  
a plurality of wireless tags;  
a wireless sensor associated with a user;  
a processor associatable with a user; and  
a storage coupled to said processor to determine the user's current position based on information from said tags, and, to wireless link a plurality of shopping carts within a retail facility through a local area network based in the retail facility and enable the carts to exchange information between themselves through said network.
